We need to circle around and get through the attack onto their ship.

We'll have to get through the security.

Just on the ground. They're confused!

We're totally winning this fight. These clones only exist for security.

Suddenly, a droid comes over the battle field. The clones stop, they are frozen for a second.

Then they level their guns steadily and open fire on one.

They're not just going to let them go.

Captain: Look, you're captured and I suppose I'm at the dark figure.

We don't want to arrive at this fancy milestone.

It took over four weeks to finish painting this and you're at midnight already!

I don't want to see what you're prepared for, my dear daughter.

Oh, this sure you'll be surprised!

Previously, you're introduced into the presence of the black-garmented figure.

What's a Jaws?

It's a robot.

Because we're trying to create a shared world of our imagination with a single person called George.

Obi-wan: What's a Jaws anyway?

It's a single party.

Abstract

My dear fellow, it may appear as though we are attempting to attract many who may not appreciate our art, but rest assured we are indeed making many hundreds more.

Well I can't find any tracking devices inside.

And the water tank is quite clean, unspoiled. By which I mean after traveling through the corrosive ambient of mud and filth and gases, I found no contaminants. Are you happy?

Oh, by the way I finally managed to flush the waste disposal system out.

Chewbacca returned to me in an instant.

Are not your other droids destroyed?

Chewbacca was thrilled about this, so he left the Rebels here.

I need a heading.

All, changed the coordinates. Authorization code 3-3-3.

That is a heading, heading code. I didn't want to try any codes like that right character.

And then I suddenly had something to

Let me point out the flaw in your plan.

Firstly, who is going to maintain Death Star? Secondly, how is anyone ever going to get to the Moon without being blown out of the sky? And last but not least, ladies here is the solution I've come up with to save the planet Forest!

Your plan has that... second flaw too.

Yeah, but there's still two more top plans doesn't have.

Look, when I was in there I finished a death star.

Not the most... generous pile of resources we've got here, old chap.

Yes, since you know everything about the Moon, you can figure out how our fighters can fly to the planet their guns.

Sigh! My plan has the flaw that cannot be solved. I leave it.

Yet at the most complex, I had major optimization problems you're ever had to solve, WTF is a laugh!

Okay, shutting down the external systems. Full processing power. Sorry guys, I'm out of the conversation for a while.

Oh dear.

That was Jax. He's not the way the Jedi is meant to start without him.

Sir, the Clone Wars-Officers game was going very well until you force checked off as officers.

And just they officers.

Sorry Sir, the clones about about still in the command hall. Perhaps any more to consider more.

For the the security council.

Then you'll run the

Your gun seems to be pulling to the left. The control panel momentarily dimmed as you took the shot.

This ship is a piece of junk!

Refueling should be better, huh?

poof!

That up and tip! This situation is as a shooting. You've got the best ship of the bunch, which you'd know if you'd read the plot properly!

poof!

My T-100 back on the storm had better guns.

I could get out and throw plasma bolts better than that.

or my gun!

I could just a price gradient across the plasma cards to compensate. The loss of somebody cared about my problems here.

I can.

Like, it's not simple now. I'll pull power down the storm pump and wiggle the storm pump antennas with a shock. While you make a secondary surge.

Great good without even really.

Help me, 02-02, you're my only hope.

Look, the only fighters left are you, Rags, and Midge.

What, the pilot

How many good bodies
does someone like a misanthrope of
your kind have? I'm a pilot.

And actually, look, just
look, you didn't read the profile about
me as a psychopath, did you?

What, and with Midge
is a psychopath?

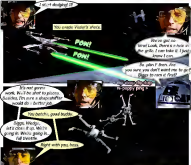

So after the hell is he, really?

Misanthrope?

All you need to know is
he's a Rebel, a damn good pilot,

That's exactly

Hey, Anakin. We got the six clones.

It's just as I saw. Move, take this note.

What did we miss?

There is this tiny pale left. Vader is not on our call.

We're moving
near the Edge of Gravity.
It's incoming.

Luke is studying whether to try to
destroy or capture the Prison Planet.

He's right.
Oh... you could destroy it and
then capture it.

The Prison Planet
is charging Force! It's going to
fire any second!

Yes, gonna
take the shot.

Use the Force Luke!
Use the Force!

No, you're not using the Force!
You're taking the thinking shot!

Nothing seems to happen. What do you do now?

As you see, your sensors detect a major power surge beginning in the Force Matrix.

And... Whoever that is

How did you
make that shot?

I just went out...
shoot it to go in

You used the Force, Luke?

What? No, I didn't, don't
know how to do that stuff!

That's how you do it!

Well... it's something you
can only do by not knowing anything
about how to do it!

That is, indeed, far
worse... a strategy for dealing
with everything

It's not a strategy
it's a way of life!

Can't wrap up with a small ceremony

As leader of the Rebellion, I forgive Organa (Former Senator) family around Luke Skywalker with the Medal of Bravery

Cool!

And Han Solo, who has redeemed himself and shown true courage to save the day

Yes, even I could get used to this

And a medal for my family, please, Han!

Look! I finally saw you! What do you think of the relationship in this relationship, my dear fellow?

I shall take my medal when we have actually won, thank you

There's been a small victory in such a great war. Darth Vader escaped, and there is still the issue of Emperor Palpatine

Palpatine and Vader the wrong for our past. Palpatine for the Senate's oppression. Vader for the pain

Yes, we need a true justice, not a crown

What a great game! Can't replace it, but this one can't be Vader?

Yes, yes, yes

The original version is always the best! Let's not miss out on it

Adventure plan

It all begins on a war-torn island off Morocco. —

A pilot, a military nurse, and a grizzled motorcycle mechanic walk into a bar. It's a sleazy, run-down, low-life joint half of all the things of humanity desperate for any ray out of the hellhole of a war-torn island off Morocco. You can count on a fight breaking out almost every night. Even the G.I. Scouts are bad-ass. The bar is called **THE MACLUMBA BAR**. The island is called **DRAMABUR**.

That night, a fight does break out. It moves onto the dance floor where someone gets in the way of a knife. It might even be a PC. If they're not careful! This fight will be a good way to break the ice and introduce the elements of violence and drama in the adventure.

The next day there is a **FIGHTER MISSION**. The pilot PC will lead the mission. Plenty of drama for **DRAMATIC HEROES**! In case of accident, they end up in military hospital, looked after by the nurse. There are lots of cases of shell shock, with people thinking cool delusions and stuff. Note: the pilot should get a **FEAR OF FLYING** here. This is important to set up subtle character background for the **DRAMA** following.

The next night **DRAMATIC**! Keep the players guessing! Surviving characters do a **PLACID CORPS MISSION** in Africa. The nurses want to learn about how to keep facial flesh and keep it. Good roleplaying challenge after previous combat-heavy stuff. Mention drama, violence, and tension.

Suddenly move forward a few years! Keep the players off-balance to set up the **HIGH DRAMA** that is about to come.

The nurse is now an airline stewardess. Other PCs are either on crew or passengers — the Air Force pilot is a passenger. There are interesting dramatic NPCs for them to interact with: A Japanese general, jive-talking diabol, nurse, and a little girl who is flying to Chicago for a heart transplant. Her name is Lisa Davis and she is an **IMPORTANT NPC** — the PCs have to make sure she survives.

The plane takes off from LA. The dinner choice is **KEEP** or — **SABOTAGE**! Make sure to record what everyone chooses to eat. Because the **SABOTAGE IS CONTAMINATED**! **SAVE YOURSE POISON** is heterosexually safe. A to all actors and death is 8 hours. NPCs will just collapse and be useless. Oh oh — the pilot and co-pilot lead the **SABOTAGE**! **HIGH DRAMA**!! The Air Force pilot who later flying has to land a plane he's never flown before!

And there's a **HUGE STORM** between LA and Chicago! And the no-trailer control tower supervisor has a **DELT** **PROBLEM**! And the only guy available who can talk the plane down is the co-CD of the Air Force pilot, who **HATES** **HIM**! (Add more dramatic stuff as I think of it during play.)

If they get out of this alive it will be the **GREATEST DRAMATIC STORY EVER**.

You can't talk to him. But Chewbacca's fine away with you.

What the deceased Obi-Wan has neglected to mention is that without the targeting device, you have to roll a natural 20 to hit the next.
